# Chapter 1

## Chapter 1 Title

### Abstract

Use the chapterabstract environment, not the abstract environment, if you want to plant an abstract at the top of the chapter.

### 1.1 Introduction

If needed Here's a quote environment.

Here's a citation, so we don't get a "no citation warning" Golub & van Loan (2013). Here's a figure. Here how to reference a figure such as Figure 1.1.

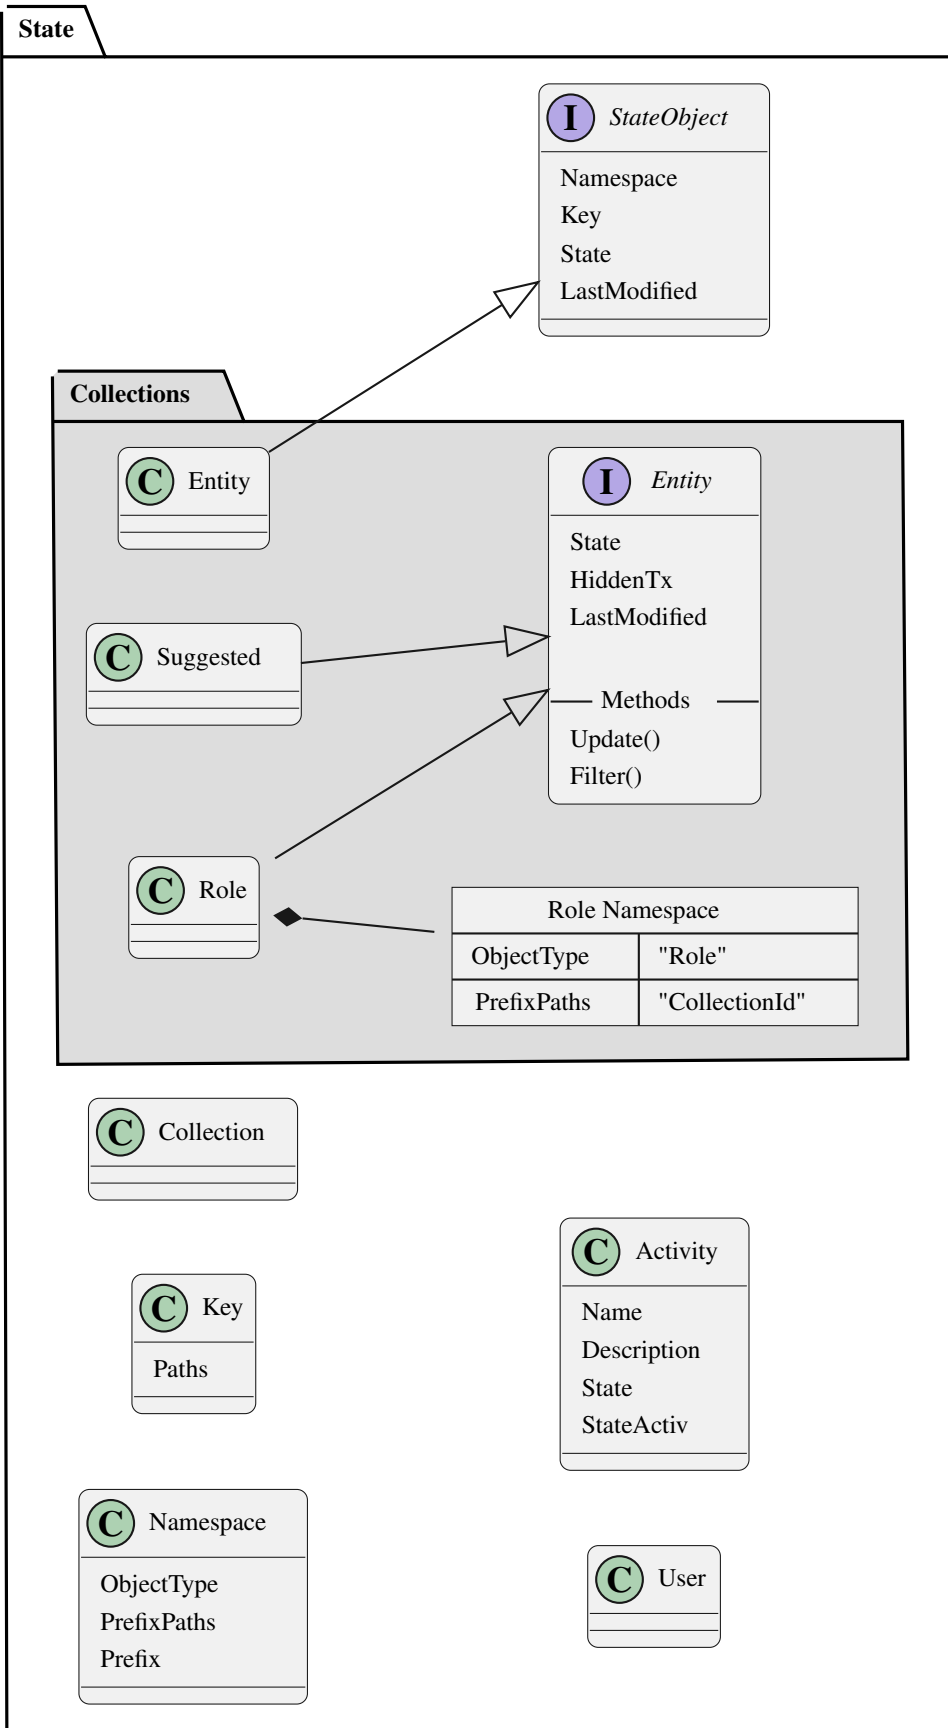

Figure 1.1: Figure for list of figures in the content page.

	R: polr	R: lrm	SAS	Stata
$\hat{b}_1$	-0.28	-0.28	0.28	-0.28
$\hat{\zeta}_1$	-4.24	4.24	-4.24	-4.24
$\hat{\zeta}_2$	-2.32	2.32	-2.32	-2.32

Table 1.1: Table for the list of tables in the contents page.

Here's a table.

## **Chapter 2**

### **Chapter 2 Title**

#### **Abstract**

Chapter 2 Abstract: Code and figure example.

### **2.1 Example Section**

#### **2.1.1 Code Example**

Check on conventions on inputting code just to be safe. This is likely field dependent, so this is worth considering. This is the default style, which is aberrant to look at. In any case, this is how subimport works for nested files to organize your document with each chapter self contained in it's own folder.

```
library(car)

pdf(file="car.inc.ed.pdf", height=5,width=5, onefile=F,
    paper="special")
plot(income~education, xlab="Education", ylab="Income",
    main="", data=Prestige)
dev.off()
```

### 2.1.2 Subfigure Example.

This is a true subfigure example.
